

GP360D MOBILE GROUNDHOG WELFARE UNIT

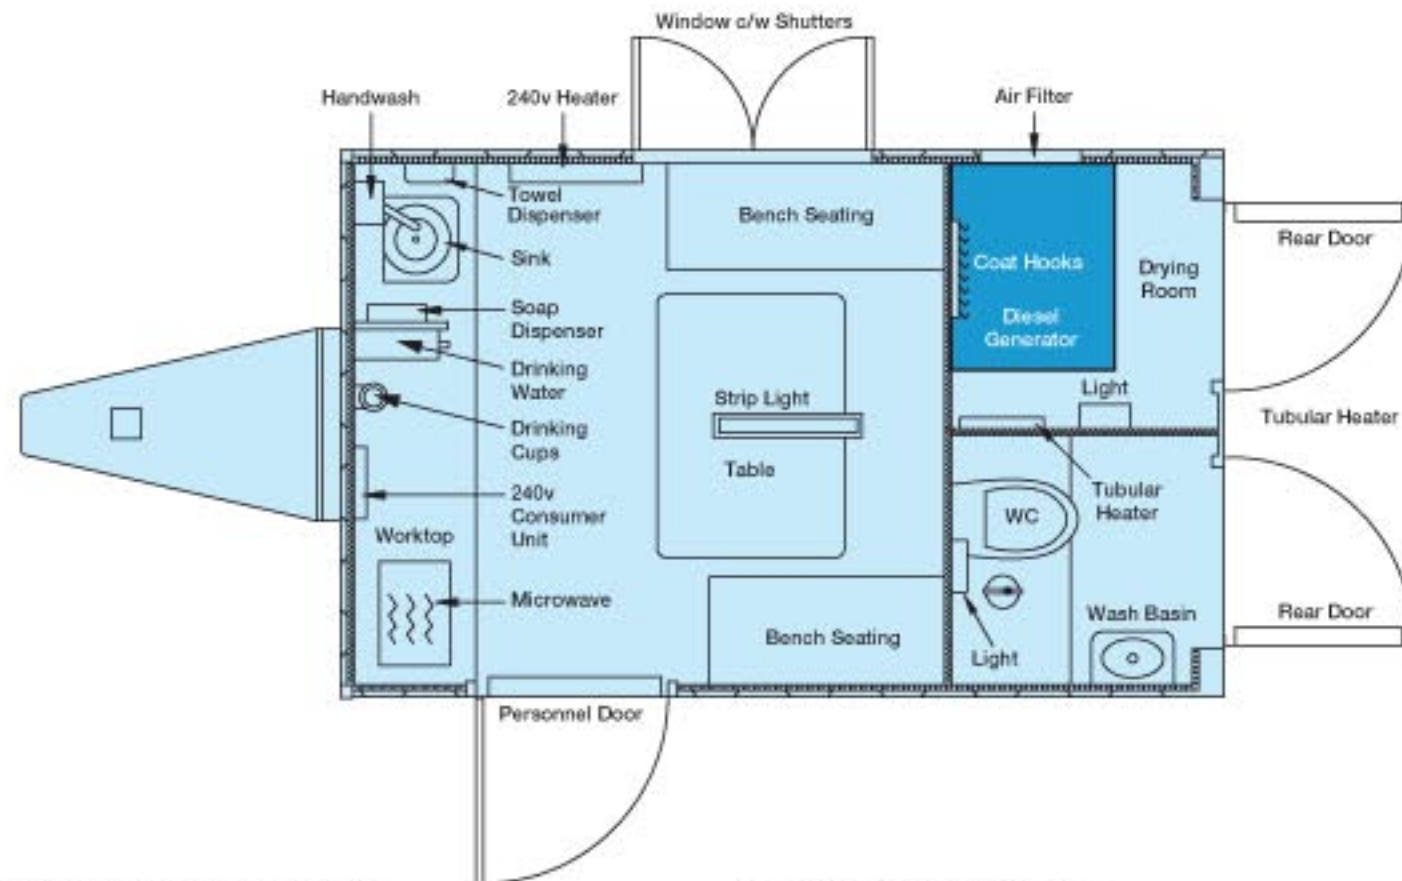

The Groundhog mobile GP360 is designed to ensure that not only do contractors on transient sites meet with current HSE regulations, but that they also have the best possible facilities for their operatives.

The Groundhog GP360 can be towed by the client's own vehicles not only to and from site, but also relocated on site giving the flexibility of progressing with the job.

The Health and Safety at Work Act for Welfare Units

Regulation 20	Sanitary Conveniences	Complies	✓
